

ALEXANDER YEHL

(323) 538-2865 ♦ alexander.x.yeh@gmail.com ♦ Los Angeles, CA

OBJECTIVE

Experienced Software Engineer & IT Professional always working to learn & develop knowledge with new technologies. Currently seeking roles in Data Science & Analytics, Software Development, and Business Intelligence.

SKILLSET

Programming	OOP, Python, C/C++, SQL, R, Shell Scripting (Batch, C-Shell, Bash), Javascript, HTML/CSS
Frameworks	Flask/Django, Selenium, BeautifulSoup, Pandas, FastAPI, Svelte, APIs (JSON/REST/AJAX)
Database	PL/SQL, MS SQL, Oracle, PostGreSQL, Data Warehouse (Star Schema) & Administration
Software Tools	Azure/AWS, Git, JIRA/Salesforce, MS Suite, Wireshark, Windows Server & Linux OS
Data Analytics	R Studio (dplyr, tidyr, olsrr, corrplot, rpart, e1071, ggplot2), Tableau, Gephi, Google Analytics
Data Modeling	Machine Learning (Logistic Regression, Naive Bayes, k-Nearest Neighbors, Decision Trees)
Business Procedurals	SDLC (Agile/Scrum/Waterfall/DevOps), Project Management (Gantt Chart/Network Diagram)
IT	System Administration, AD, IPSec, Virtualization, Networking, Hardware, Troubleshooting

PROJECTS & FOCUSED DEVELOPMENT

- Player Data Statistical Tracker** *Tools: Python, FastAPI, SQLAlchemy, PostGreSQL, SQLite3*
- Designed & built an asynchronous REST API service with Riot League of Legends API endpoints using Python & FastAPI to track Account Info, Match Data, and frame-by-frame Timeline Data.
 - Stored captured data into both PostGreSQL & SQLite3 databases using SQLAlchemy + Alembic to handle schema version control that can be replicated automatically to handle Database modeling changes.
 - Created endpoints to retrieve data for analytical purposes to find patterns with various statistical attribute combinations.
 - Used R Studio in conjunction with player data to capture and display various player/match trends & patterns.
 - Created a website using Svelte-kit/Typescript to display derived data & analysis with graphic models.
- WellCareCorp Database** *Tools: PL\SQL, Oracle RDBMS, MS Visio*
- Designed and implemented a fully-functional normalized Enterprise Database using PL\SQL & Oracle RDBMS
 - Populated database with data created from User-Generated Scripts, Triggers, Stored Procedures, and Queries
 - Initial Design documents complete with Entity Relationship Diagrams, Relational Schemas, and Data Dictionaries
- Cafe Data Analysis** *Tools: R Studio*
- Cleaned & processed economic variability dataset to determine best suggestions for improving overall Spend per Customer
 - Used Data Modeling techniques (Logistic Regression, Naive Bayes, k-Nearest Neighbors, Decision Trees) to find best predictors for recommendations to management
 - Generated resultant plot points & trends in Data Visualizations to assist in analysis & presentation
- Lingo Language Learning Application Design** *Tools: MS Project/Visio, Figma*
- Created a Language Learning application mock-up designed to help users learn new languages through P2P connections
 - Used UX Wireframe designs, Entity Relationship Diagrams, and Data-Flow Diagrams
- Tableau Aviation Analysis: Birdstrikes** *Tools: Tableau, MS Excel*
- Created tableau story & dashboards examining the effects of Birdstrikes on air traffic using a derived 2001 - 2013 dataset
 - Derived potential casual links between various categorizations and visualized them for easy-to-read graphics. Classifications included: Regions & Locations, Damages & Costs, Weather & Day/Time, Types & Sizes of Wildlife, Flight Types & Phases

PROFESSIONAL EXPERIENCE

Data Engineer, Development/Operations Associate
Wilshire Associates

Sept 2018 - May 2023
Santa Monica, CA

- Project lead/developer for internal full-stack Web Applications to facilitate easier data manipulation for team members to access data from the SQL Server Data Warehouse indirectly, using Python/Flask libraries hosted through Windows IIS
- Create and manage data flows through usage of SQL Stored Procedures & Jobs through MS SQL Server for data manipulation and intake/delivery of input/output files.
- Create flow processes for daily data retrieval/manipulation/delivery through Web Interfaces and Data Warehouse pipelines.
- Create & manage data mining/scrapers with Batch, Python libraries (Selenium/BeautifulSoup/Requests), UNIX/Bash to grab Web Data and generate database-loadable format files.
- Mentored new team members in production/operational capacities involving data processing, security, & output.
- Work in Production capacity to verify/fix real-time data file generation & delivery issues during nightly/weekend operations & ensure data operations run in timely capacity.
- Create & implement solutions & utilities to provide alternative means of data quality checking & manipulation, including various error-checks & monitoring responses.

System Administrator, Support Engineer
Wilshire Associates

Aug 2016 - Sept 2018
Santa Monica, CA

- Dual application support & system administrator roles, supporting both proprietary application & related tools and utilities to external clients as well as managing the IT infrastructure for hosted in-house platforms.
- Operations with Windows and UNIX technologies including VMWare, Citrix XenApp & Receiver, MS SQL server, UNIX shell scripting (Bash, C-Shell).
- Installing and managing server environments using Windows Active Directory, Windows Servers, UNIX Solaris Servers, Citrix XenApp, and Apache Tomcat.
- Working with clients, Relationship Managers, and all levels of IT/Application Development/Business Management to determine the best optimization & workflow strategies.
- Programming/scripting utilities using C++, Shell/Bash, Batch, and PowerShell.
- Utilizing Salesforce.com and JIRA to track bugs and service any client & application issues and errors.

Technical Consultant
Pan-Tech

Aug 2011 - Aug 2016
South Bend, IN

- Provided infrastructure/record management & technical support coordination with vendors/third-party in-house & on-site.
- Prepared business requirement documentation for application/infrastructure projects incorporated with security, computing, networking, and storage.
- Delivered solutions for troubleshooting technological system/application issues, as well as escalating issues to appropriate vendors if necessary, ensuring timely & accurate resolutions.
- Supported user testing of software/products for customers and business clientele including Early Childhood Development Center, St. Margaret's House of South Bend, LeadershipINS Insurance, ManagedCare organizations & Technical Services.

Office of Information Technology - Support Technician
University of Notre Dame

May 2012 - Aug 2015
Notre Dame, IN

- Provided T1 support to users through email, phone, and in-house requests.
- Delivered solutions for troubleshooting technical issues including networking, software configurations, & mobile platforms.
- Researched, compiled, and documented various solutions to both common & uncommon issues for other support staff to ensure rapid, minimal response times for users.

Performance Support Tool Developer
Sprint Corporation

May 2014 - Aug 2014
Overland Park, KS

- Worked in transferring frameworks & developing a friendly UI from mobile applications support project BOSS and incorporating them into new ASSIST Tool to support vendors in efficiently delivering products and services to customers.
- Developed and tested Mobile Customer Support Tool in both front & back-end areas to support cross-platform versions across mobile device & web application usage with repository handling.
- Researched and documented solutions for training developers in using newly developed software for current/future projects.
- Assisted in project implementation phases and provided support functionality during the pre-production/roll-out as well as keeping team progression through weekly agile/scrum meetings.

Engineering Dept - Technical Consultant
University of Notre Dame

May 2010 - Aug 2010
Notre Dame, IN

- Provided T2 & on-site assistance for departments and offices in Engineering & Science colleges.
- Aided department in overhauling and updating Linux/UNIX and Windows platforms, along with their respective software.
- Performed routine maintenance & upgrades to clustered machines/terminals and other networked department devices.
- Coordinated with other Technical Departments to script and test operations for multi-platform use.
- Worked with Engineering Science & Computing department directors to generate new routines & tools to monitor systems for management and network uses, as well as aid in future system overhauls.

EDUCATION

Masters of Management Information Systems, University of Arizona

Jul 2025

Certificates: **Business Intelligence & Analytics (BIA)**, **Enterprise Information Security (EIS)**

GPA: **4.0**

Bachelors of Computer Science, University of Notre Dame

Aug 2015
